Homeland (Arabic "Vatan" - motherland) is the place, territory, social environment, country where people live, their descendants and ancestors were born and raised. Homeland is a concept that embodies a person's psyche, lifestyle, mind and thinking, past, present and future. Homeland starts from the threshold, from the corner where he was born and raised. That is why it is necessary to have eternal love and loyalty to the house where he lives and breathes, to the mother earth, which is a magnificent and powerful place where he grows up. Every person's love for the Motherland is absorbed into his body by mother's milk, mother's love and parental love. A child who does not love his parents, descendants, their traditions, customs, and profession does not love others. Also, he is proud of his nation, people, literature, art, religion and culture, inspired by the nature of the country where he grew up, and does not realize the value of its sacred soil. And this is nothing but arrogance.

After all, no person can find happiness outside the Motherland. A person who is not respected in his own country is not appreciated in another country. That's why in our people, "Be a shepherd in your own country until there is a sultan in another country", "It is better to be a shepherd in your own country than to be a horn in another country", "If you die, stay in your country!" such stories are not told for nothing. A person who has traveled and lived in a foreign country knows how valuable each person's home, home, and homeland are. The great thinker Alisher Navoi, Babur Mirza, Furqat and other great-grandfathers of ours lived far away from their native homeland with a strong homesickness, they saw the soil of the motherland and the fruits that grew in it. It is clear to everyone that they suffered for the love of the country. Their spiritual experiences are the state of a true patriot. A true patriot, wherever he lives, does not leave the Motherland on a good day or on a bad day, he stays with it.

The highest feeling in a person is the feeling of Motherland. This feeling starts from the first day a child is born. In Uzbek families, children are cradled in cradles. Alla is one of the ancient, important educational types of the Uzbek people. It is difficult for a child who does not enjoy his mother's heart to feel love for his parents and the Motherland. There is probably no girl who has not been told by Allah or who has not grown up hearing Allah. That's why it is usually a characteristic of mothers to say alla, and she conveys all her love, dreams, and heartache to her child through this song and educates him in this spirit. A child who grows up listening to Allah develops a special feeling of love and respect for his

parents. He loves his motherland, where he was born and grew up, he cannot enjoy the nature of another country, he is proud of the big and small achievements of his country, he even enjoys the movement of a tiny ant. , this feeling is manifested only in a person who has given his strength and opportunity to the beauty and development of this society and nature.

Both the motherland and the feeling of love for the Motherland are divine blessings, and a person who has this feeling in his blood vessels will never have a tendency to abominable barbarism like patriotism and treason. After all, it is not for nothing that it is said that "The gardens and gardens of another country are not visible like the garden of your own country." "Feeling of the Motherland is remembering hundreds of martyrs, such as Tomaris, Shiroq, Spitamen, Najmuddin Kubro, Solikbek Dodkhoh, Mullah Aliqul Dokhoh, who defended the Motherland and sacrificed themselves for the Motherland."

Jalaluddin Manguberdi, Temir Malik, Abdumalik Tora, Kurbanjon Dodkhoh, Madaminbek Namozbotir, who fought against the enemy until the last drop of blood remained in his veins, resigned from the post of the military minister in order to be a shoulder to his brothers in difficult times. It is to remember the name of Anwar Pasha, who came to Turkestan and died in fierce battles, and the defenders of Akmasjid, Shymkent, Avliyoota, Tashkent, Jizzakh, Samarkand, Zirabulok, who preferred death to slavery. The sense of homeland is not to forget the memory of the rebels of Tashkent, Jizzakh, Andijan, Dukchi Eshon, who rose up against the colonial system.

The sense of homeland is the self-sacrificing intellectuals who called the people to be enlightened in order to get rid of oppression and tyranny, called for national revival, and believed that salvation is in science, unity and action, their leaders Munavvar Qori, Mahmudkhuja Bekhbudi , Abdullahhuja, Avloni, Fitrat names are always in mind.

The feeling of the homeland is the thousands of nationals like Abdulla Qadiri, Cholpon, Fitrat, Usman Nasir, who went through the pains of imprisonment and exile and died in the repressions organized against our people in the twenties, thirties, forties, fifties and finally the eighties. don't forget the flowers. The feeling of the motherland is to honor the memory of our compatriots who fought valiantly against fascism in the Second World War.

Heroes defending the homeland will never disappear from the history of mankind. Protecting the Motherland, guarding every corner of it, is a sacred duty, and having a free and independent Motherland has never been easily achieved. Eternal remembrance and commemoration of those who died for the freedom, independence and freedom of the Motherland is the faith and conscience of everyone before the people, the nation, and the Motherland.

Among the people, the word "Mother" means the Motherland, and the word Motherland has a figurative meaning. For some reasons, our compatriots living in other countries also say with longing and pride: "My motherland", "my fatherland", "the land where my navel blood was spilled". no incarnation.

National pride and national consciousness are criteria of patriotism. Therefore, one of the main tasks of every citizen of our society, parents, state and public organizations is to instill patriotism and national pride in the minds of young people. The sense of patriotism has a very comprehensive content of belief, which embodies the following: Patriotism means respect, honor, faith and love for one's family, place, country where one was born and raised; Patriotism is love and loyalty to one's parents, relatives, friends, people, nation, Motherland; Patriotism is essentially a deep knowledge of the family tree, generational traditions, customs, professions, moral and spiritual values, and respect for them, and a sense of pride in one's ancestors; Patriotism means a perfect knowledge of the essence of the state symbols, pride in it, a broad outlook, and the formation of political consciousness and thinking; Patriotism is the perfect knowledge of the history, language, literature, art, religion, culture, heritage of our people, our Motherland, and the ability to demonstrate their activity on a world scale.

In conclusion, we can say that patriotism is a comprehensive concept that is ingrained in every person with father's blood, mother's milk and the fertilizer of ancestors. Fulfilling patriotic duty is an honor for every citizen.
