### INTRODUCTION

Small business and private in business services of size increase the economy development, population employment and income in raising important is a factor. Services field representatives each bias support in order to last two half in President's out of fifty more than decree and decisions acceptance done.

Including entrepreneurship activities state from the list transfer, various permits get and another many services procedures simplified. In this regard convenience Create for State services agency and his in places centers organize done Small business and entrepreneurship of subjects rights and legal interests protection to do according to the position of representative ( business ombudsman). current done.

### METHODOLOGY

All in the regions entrepreneurs appeals acceptance so, solution to do Assisting Prime Minister reception rooms organize done Ministers Court in the presence of Entrepreneurship activities development support state fund activity to the road 200 billion soums were added to it and \$50 million in funding separated. Commerce banks by to entrepreneurs being separated loans volume increased Such practical measures own the result is giving Small business our country gross internal of the product about 60 percent of the industry products of size from three one, a village farm 98 percent of products, investments half provides. Many in the regions 70-90 percent of exports exactly small to business right will come.

Current in 6 months of the year entrepreneurship subjects the number is 60 thousand increased Service pointer small enterprises and organizations number increase because of worker of seats organize to be

done cause was Also Information technologies and communications development Ministry with together cooperation fairs transfer, product and services own the owner to find for " Single electron cooperation the stock market portal organize reach according to assignments given

## ANALYSIS AND RESULTS

In our country small business and private in business services field scope up is going Today's to the day come to our society services field in development, the world in experience wide applied to principles action are doing Above circumstances in consideration received without small business and private in business services volume dynamics quantitative average addition growth from the indicator used without analysis done:

$Y_i$	Years	Small business and private of entrepreneurship economy in networks main indicators volume, services ( billion soums )
$Y_1$	2016	61346.2
$Y_2$	2017	69212.7
$Y_3$	2018	84433.4
$Y_4$	2019	103106.6
$Y_5$	2020	114052.7
$Y_6$	2021	144812.7
$Y_7$	2022	173157.7

Table 1. Uzbekistan in the Republic k is internal business and private of entrepreneurship economy in networks main indicators volume, services ( billion soums ), state statistics agency official from the site received

The statistic in Table 1 information analysis in doing the following economic dynamics quantitative average addition growth from the indicator was used.

$$Y_{n+1} = Y_n + \Delta\bar{Y} \quad (1)$$

this where,  $Y_n$ - dynamic series of the indicator at point  $n$  value,

$Y_{n+1}$ - of the indicator at point  $n+ 1$  projected value,

$\Delta\bar{Y}$ - the average incremental value of the dynamic range.

$\Delta\bar{Y} = (Y_n - Y_1)/(n - 1)$  is equal to

$$\Delta\bar{Y} = \frac{Y_n - Y_1}{n - 1} = \frac{Y_7 - Y_1}{7 - 1} = \frac{173157,7 - 61346,2}{6} = \frac{111811,5}{6} = 18635,25$$

$$Y_8 = Y_7 + \Delta\bar{Y} = 173157,7 + 18635,25 = 191792,95$$

## CONCLUSION

Summary in place to say maybe small business and private in business services volume dynamics quantitative average addition growth from the indicator using 2023 for small business and private in business services of size forecast indicator was determined [4,5].

Today's to the day come to our society services field in development, the world in experience wide applied to principles action are doing Economical development due to Uzbekistan international economy in the system more and more own position strengthen is going And this own in turn services field infrastructure improvement, its the world in the market strong competitor as appear to be provide necessity cause releases
