### Annotation

despite the fact that peace and stability prevail in our country today, the preservation, protection and strengthening of independence will continue to be a priority goal. On the one hand, if this is due to the fact that independence gives us the right to own our country first, to restore our future with our own hands, to benefit from the wealth of our country only in the interests of our people and homeland, on the other hand, the youth of Uzbekistan also enjoy this family blessing, on the other hand, in the years of independence, he gave the right to live on the basis of such sacred values and national traditions.

To maintain it, it will be necessary to preserve independence. It is well known that the natural aspiration to national self-awareness until independence was ignorantly denied. Such sacred national holidays as Navruz, Ramadan, Kurban hayiti were prohibited. The names of our ancestors such as Amir Temur, Imam Bukhari, Imam Termiziy, Ahmad Fergani, Bahauddin Naqshband, Hoja Ahmad Yassavi, Najmiddin Kubro, Abdulla Qadiri, Abdurauf Fitrat, Abdulhamid Chulpan, Mahmudhaja Behbudiy, were tried to erase the names of the national liberation movement from the memory of our people. Today, thanks to independence, our names, national and spiritual values have been restored and we have a deeper understanding of ourselves.

Today, young people are studying their national history. It is also a great achievement that the restoration of native language, culture, customs and traditions creates conditions for them to realize their identity. Today, young people are simply not studying their national-spiritual values. They enjoy the achievements of the peoples of the world. To be able to study in foreign countries, acquire knowledge, master scientific and technical achievements, advanced technologies and introduce them into the social life of our society.

It is known that in 2008, young people under the age of 18 in our country accounted for 10 million 360 thousand people, or about 40 percent of the total population, while those under the age of 30 were 17

million 80 thousand people or 64 percent.

In itself, it turns out that the issue of attracting our attention to the problems that have not yet been solved by young people who make up the majority of our population, turning them into a truly decisive force in our lives is the focus of our public attention.

After all, as our compatriot noted: "before us is an incredibly important, a new task that will solve our future. This task consists in the formation of the spirituality of a free civil society, in other words, in the upbringing of Free, well-aware of its rights, those who know immortality as an or for themselves, those who believe in their own strength and mind, and those who, at the same time, see their personal interests in harmony with the interests of the people," .

It is known that education is a process aimed at shaping the spirituality, decency, self-awareness, attitude to the side-surroundings of a person. Therefore, in ensuring the proportionality of this process, it will be necessary to conduct educational work in a harmonious way. Through education, young people, along with learning a certain profession in finding their place in life, prepare themselves for a future life.

The spirituality and culture of the people, its true history and originality, the restoration, the successful progress of the renewal and development of our society are decisive in the silencing of progress, the beginning is of great importance. President I.A.Karimov noted that as long as we aim to build a legal democratic just state, raising the spirituality that embodies the cultural and most sensitive feelings of our people, deep philosophical, political, legal concepts has become one of the main and priority tasks.

This article covers the main place of small business and business in today's market economy. Including scientifically analyzed the development of small business and business, and the legal basis, at this time financially support small business and business, the latter is amended and the rules for this branch of national legislation are added.

Reliable system evaluation quality education allows satisfy informational needs various participants educational relations (students and parents, teachers and managers, employers and specialists), a also adjust politics on ensuring quality education. In an article consistently revealing the principles of the Bologna process for measuring the quality of education, the dynamics of internationalization and the logic of integration in European higher education and in Eurasia.

This article analyzes the co-evolution of the family and society, the diversity of approaches to family development, the variability of the family in space and time. In addition considering the modernized forms of the modern Western family, there emphasized one-sided approaches to developing family. It reveals the need to take into account the dominant influence of the social environment while strengthening family relations.

Constitutions have a law and an internal structure. The external structure of the Constitution describes its relationship with other sources of law, the totality of relations, its place and role in the legal system and its significance in the system of social and normative regulation in society.

Today, the essence of reforms in the field of Education based on the " national model " is not only to ensure the priority of national values, but also to promote the development of a new era-the education system that builds on the basis of great achievements in World Science and education and national identity.

The narrative of philosophical education is a process inextricably linked with the development of mankind. In the further development of philosophical education, it is important to pay special attention to the comprehensive study of the scientific and philosophical heritage of the Eastern thinkers, in particular the scientists of the Islamic world, who have added a worthy attribute to the development of our society. To do this, it is necessary, first of all, to create truthfully illuminated studies, textbooks of the new generation, books, program manuals.

Society can not achieve its prospects without developing and strengthening spiritual values in the minds of young people. "The preparation of the personnel of the new generation, which will solve complex and large-scale tasks for the modernization of our country and the construction of a modern society, will

continue to be the most important direction of our activities," he said. A. Karimov. And independence is an important condition for the implementation of this task. As long as the people or nation have the right to self-determination of their own destiny, they can freely determine the path of their independent development, educate young people on the basis of their national values.

But without the liberalization of all aspects of society's life, real freedom can not be achieved. The idea of freedom and the spiritual heritage of the people for thousands of years served as a powerful source of their ascension to the peoples of the East.

The role of young people in the worldview, relying on national and spiritual values, its interpretation and implementation of economic and political reforms in our society is one of the main problems of today. Freedom for the nation is a noble expression of the tantanum of Justice. Freedom does not allow someone to become addicted, to spoil someone's property, to betray someone, to kill or harm someone.
